(1) Review of Business Performance in the Current Consolidated Fiscal Year

1. Business Progress and Results

Economic Environment

During the consolidated fiscal year under review, although signs of an economic slowdown were spreading, mainly in China during the latter half of the year due to US-China trade friction, on a full-year basis, economies in developed countries such as Europe and the United States of America continued to exhibit stable growth, led by domestic demand. The world economy also remained resilient.

Overall Summary of Sales

The THK Group has identified “Full-Scale Globalization,” the “Development of New Business Areas,” and “Change in Business Style” as cornerstones of its growth strategy to expand the markets of its products such as LM Guide (Linear Motion Guide). As to Full-Scale Globalization, while the markets in emerging countries such as China are growing by dint of the factory automation progress, which is also spreading to developed-country users, the THK Group endeavors to expand its global sales network to meet such demand. Regarding Development of New Business Areas, while the THK Group’s products are getting widely adopted in new business fields such as automobile parts, seismic isolation and damping systems, medical equipment, aircraft, robot, and renewable energy, the THK Group is working on expanding sales of not only existing products but also new developed products. In addition to promoting these strategies above, the THK Group is also committed to further expand its business fields by changing its business style enabled by making full use of AI and robot technologies in many ways.

During the consolidated fiscal year under review, despite signs of adjustments of demand in the electronics industry in the latter half of the year, the THK Group captured the demand, which was increasing before entering the adjustment phase, and successfully increased sales. As a result, sales revenue for the period amounted to ¥353,479 million.

As a result, THK recorded ¥51,758 million of ordinary income and ¥35,400 million of net income attributable to owners of the parent.

Segment Breakdown

In Japan, while exports slowed down, capital investments were strong and the economy gradually rallied. In such a situation, where demand was robust in overall industries, the THK Group successfully recorded ¥160,742 million of sales revenue and ¥38,460 million operating income (segment income).

The Americas

Sales Revenue (Billions of Yen) Operating Income (Billions of Yen)

In the Americas, while the economy continued its growth trend led by the robust consumer spending, the production and sales sections worked in unison to expand and deepen transactions with existing customers and to cultivate new business fields such as automobile, medical equipment, aircraft, and energy-related business. In such a situation, where demand for electronics products and machine tool products was strong, the THK Group successfully recorded ¥69,882 million of sales revenue. However, the profitability of the transportation equipment business declined due mainly to unfavorable exchange rate fluctuations. As a result, THK recorded ¥309 million of operating income (segment income).

Europe

Sales Revenue (Billions of Yen) Operating Income (Billions of Yen)

In Europe, while the stable economic growth continued because of strong capital investments, the production and sales sections proactively worked in unison to expand transactions with existing customers and to cultivate new business fields such as automobile, medical equipment, aircraft and robot. In such a situation, where demand for general machine products and machine tool products was strong, the THK Group successfully recorded ¥59,482 million of sales revenue. However, the profitability of the transportation equipment business declined due mainly to unfavorable exchange rate fluctuations. As a result, THK recorded ¥74 million of operating income (segment income).

China

Sales Revenue (Billions of Yen) Operating Income (Billions of Yen)

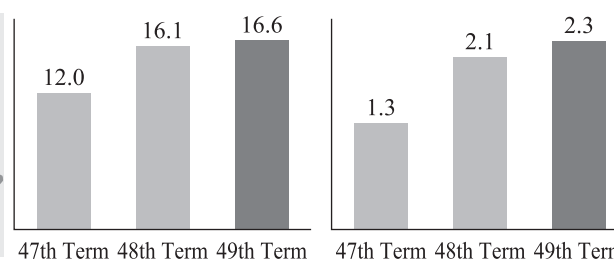

In China, while adjustment phases caused by the US-China trade friction concern were widely seen in capital investments in the latter half of the year, the THK Group captured the growing demand for electronics products and robotization and automation-related products. As a result, the THK Group successfully recorded ¥46,735 million of sales revenue and ¥8,194 million of operating income (segment income).

Other Areas

Sales Revenue (Billions of Yen) Operating Income (Billions of Yen)

As a result, sales revenue and operating income (segment income) were ¥16,636 million and ¥2,384 million, respectively.

Overall Summary of Research and Development

The THK Group is actively engaged in R&D activities, conducted primarily at the new Head Office to which we relocated in October 2017 and the Technology Center (Tokyo) as an R&D base, to develop core LM systems and other products by applying the core technologies and know-how in Linear Motion Systems, including mechatronics such as Precision XY Stage and Linear motor actuators, and products in fields close to consumer goods such as automobiles, seismic isolation and damping systems, medical equipment, aircraft, renewable energy, and robotics. Turning to activities outside Japan, THK established the R&D Center in China, the Company's first overseas R&D facility, in 2010 and started its full-scale operation in 2012. Together with the R&D Division of Germany-based THK RHYTHM AUTOMOTIVE, a subsidiary included in THK's scope of consolidation in 2015, the THK Group is working to establish an R&D framework for product development at

optimal locations covering the Americas, Europe, and Asia to enable development of products that more accurately meet diverse needs of global customers.

In the industrial machinery business, THK renewed the LM Guide global standard Model HSR to enhance its functions and expand the lineup, while developing the user-friendly Roller Guide Model HRX in a wide range of markets. In addition, THK launched the Model SHS-LE, which is integrated with a linear encoder manufactured in-house, in the market, in order to contribute to further downsizing of machinery equipment. In the ball spline, we added the rotary type Model LTR-V/LTR-AX to the Model LT-X, with a view toward proposing devices that are more compact and move at higher speeds. Regarding ball screws, we developed the High-speed Ball Screw Model BSM for machine tools. Through further evolution of the circulation structure, we will realize a DN value of 170,000, in order to develop a market for higher-speed machine tools. In addition, we will develop the DIN standards-compliant double-nut Model SDAN-V, in order to enhance our competitiveness in emerging markets.

In IoT-related fields, THK is proceeding with preparations for the service operation of OMNI edge, which is equipped with network functions, by launching failure diagnosis and lubrication diagnosis for the LM Guide, and a preload detection system for ball screws in the market. In doing so, we will work to realize the provision of integrated service, from predictive failure detection to the procurement of aftermarket products. Regarding actuators, THK will develop the full cover Linear Motor Model ULM, in an effort to expand the market for transport equipment and other devices. In addition, we have developed the picking robot hand system Model PRS, which automates item picking at distribution centers, as we proceed with the development of new markets. In the robotics field, THK has expanded SEED Solutions, which is a product line of elements and components for next-generation robots, with an eye toward contributing to total cost reduction for customers, and added the small electric actuator Model BA-ST to the lineup. Furthermore, this fiscal year, we sponsored the World Robot Summit (WRS) in order to contribute to the launch of the service robot industry.

In the automotive & transportation business, THK launched aluminum products which were manufactured by a new method to meet the needs for reducing the weight of automobiles, and strived to expand sales. In addition, in North America, THK succeeded in internalizing aluminum forging technology and shipped the products to customers.

In addition to the linkage and suspension (L&S) business, the THK Group succeeded in mass-producing ball screw products for transportation equipment and started shipment for electrically powered systems and autonomous driving-related products. Furthermore in order to expand this field, the THK Group proposed new linear motion-related products that match development needs of customers.

Overall Summary of the Operation and Production Systems

In our four key geographical regions of Japan, the Americas, Europe and Asia, the THK Group is pursuing the establishment of the unified producer-retailer system at locations closer to centers of demand. In addition, we are making various efforts to expand sales to wide-ranging customers who actually use machinery equipment, in addition to machinery equipment manufacturers.

In terms of sales activities, the THK Group expanded sales of semi-custom order products to the LM Guide and ball screws, in addition to the LM Guide Actuator. We also further expanded the areas supporting Omni THK, an e-commerce website that enables customers to easily select and order products—anytime, anywhere—either face-to-face or non-face-to-face, to China, Brazil, and parts of Japan, in addition to the ASEAN region, in order to enhance our global, efficient sales structure.

Furthermore, we started considering the commercialization of OMNI edge, a new service for realizing predictive failure detection at customer facilities, comprising technology that visualizes the status of the LM Guide and the IoT Connect System developed with Cisco Systems G. K. and NTT DOCOMO, INC.

In terms of production, the THK Group continued to promote the incorporation of robots into the production process and automation of production lines in each region, and also completed construction of new plant expansions in Yamagata and Vietnam (construction in Yamagata was only partially completed). In addition, the THK Group further strengthened its production structure, primarily by also commencing construction of a new plant in India, where demand is expected to expand over the medium to long term.

Term-end Dividends

Our policy regarding dividends is to continue stable dividend payments, as well as to make efforts to flexibly return profits to shareholders according to business results, while strengthening the financial position by increasing internal reserves. We will effectively utilize internal reserves to conduct R&D activities and undertake capital investment in production facilities and information systems to respond to globalization, in order to meet the expectations of our shareholders. Under this policy, taking comprehensively into consideration the management environment, etc., surrounding the Company, we intend to pay a term-end dividend of ¥38 per share, which, along with the interim dividend of ¥47 per share, results in an annual dividend of ¥85 per share.

(3) Description of Main Business Operations (As of December 31, 2018)

The Company manufactures and sells vital machinery components including LM guides and ball screws, and vital components for transportation systems such as link balls and suspension ball joints. The Company's principal customer base includes manufacturers of industrial equipment such as machine tools, general machinery and semiconductor manufacture equipment, as well as transportation equipment manufacturers of automobiles and motorcycles. In addition, under the policy "production in the district having demand is production in the optimal district," we are working to build a "unified producer-retailer system at the locations closer to centers of demand" in the four key geographic regions of Japan, the Americas, Europe and Asia.

LM guides, our core products, enable "rolling" in linear motion parts in a mechanical device, etc., achieving lighter and more accurate movements compared with a "sliding" motion. This feature enables mechanical devices to move with higher speed, higher precision and enhanced energy saving, thereby contributing to the development of industry and the preservation of the ecosystem.

(4) Future Tasks

The Group's business performance is currently affected by variable industrial capital investment trends. To alleviate the associated business risk and achieve middle-to-long-term growth, the Group has expanded its business areas through the three strategies of "Full-Scale Globalization," "Development of New Business Areas" and "Change in Business Style."

For "Full-Scale Globalization," we believe there exists great latent demand for linear motion systems because the usage level of these systems overseas is lower than that in Japan, whereas the awareness of these systems, including the Group's LM guides, is high and their market share is large at home. Especially in China and other emerging countries, where higher economic growth is continuing, compared to advanced countries and FA is expected to continue to progress further in the future, we believe that demand for our products will increase significantly over the medium to long term. For "Development of New Business Areas," we believe that while the main customers of our LM guides and other product groups are now capital goods manufacturers, there exists a huge demand for these products in fields close to consumer goods, such as automobiles, seismic isolation and damping systems, medical equipment, aircraft, robotics and renewable energy.

In order to capture such demand, we will work to further expand our business areas via "Change in Business Style" by thoroughly applying AI and robot technologies in all aspects, while promoting "Full-Scale Globalization" and "Development of New Business Areas."

Along with these initiatives, we will press ahead with improving profitability and strengthening our financial position to raise our corporate value.

(5) Basic Beliefs towards the Elimination of Anti-Social Forces and the Degree of the Introduction of Necessary Steps

The Company has established its own system which aims to remove anti-social forces as below:

- A. The Company has declared in the “THK Basic Policy” that it shall “take a firm stance against anti-social forces.”
- B. The Company, as a member of the “Liaison Council of Tokyo Metropolitan Policy’s Anti-Crime Syndicate (the “Council”),” collects information at monthly meetings hosted by the Council and on other occasions. In addition, the Corporate Strategy Headquarters is engaged in the management of relevant information in an integrated manner.

By doing so, the Group will take initiatives with the aim of enhancing the THK Group’s medium- to long-term corporate value by continuously growing through appropriate cooperation with stakeholders.

The Company’s basic policy regarding takeover defense measures calls for not introducing such measures. When a party attempts a large-scale acquisition of the Company’s stocks and the Company’s stocks are targeted for a tender offer, the Company will clearly explain the stance of its Board of Directors and counterproposal, if any. At the same time, the Company will not take any measures to unreasonably interfere with shareholders’ right to relinquish the stocks upon accepting the tender offer.
